ABOUT COMPANY & PROJECT:

Bonert's Slice of Pie was established in 1993. The company was founded to sell pies on a wholesale level to supermarkets, delis, and club accounts. In 1993 we started producing 8" and 9" pies. Seventeen years later we have the capacity to produce 4", 5", 6", 8", 9", 10", 11" and 12" super gourmet pies in over 400 varieties and flavors. We now ship to all four corners of the United States, as well as Hawaii.

At Bonert's Slice of Pie we are determined to win our customers' respect through service, value, and the integrity of our pies.

Client needed Salesforce CRM integration with the Macola ERP to manage customers and orders and to produce profitability and other miscellaneous reports. We integrated Salesforce to create sales order and sync with Macola ERP to replicate sales order in the ERP systems as well as to get the purchase order from Macola to sales force. This was done to produce reporting and updates to the managers who only have access to salesforce.
