

Haventec Silent MFA: Multi-factor protection without the multi-factor friction.

- 1

A familiar authentication experience...
- 2

...that does not require your customers to change their behaviour....
- 3

...every login initiates a silent multi-factor authentication....

• Your customers simply enter their username and password (just like they do now).

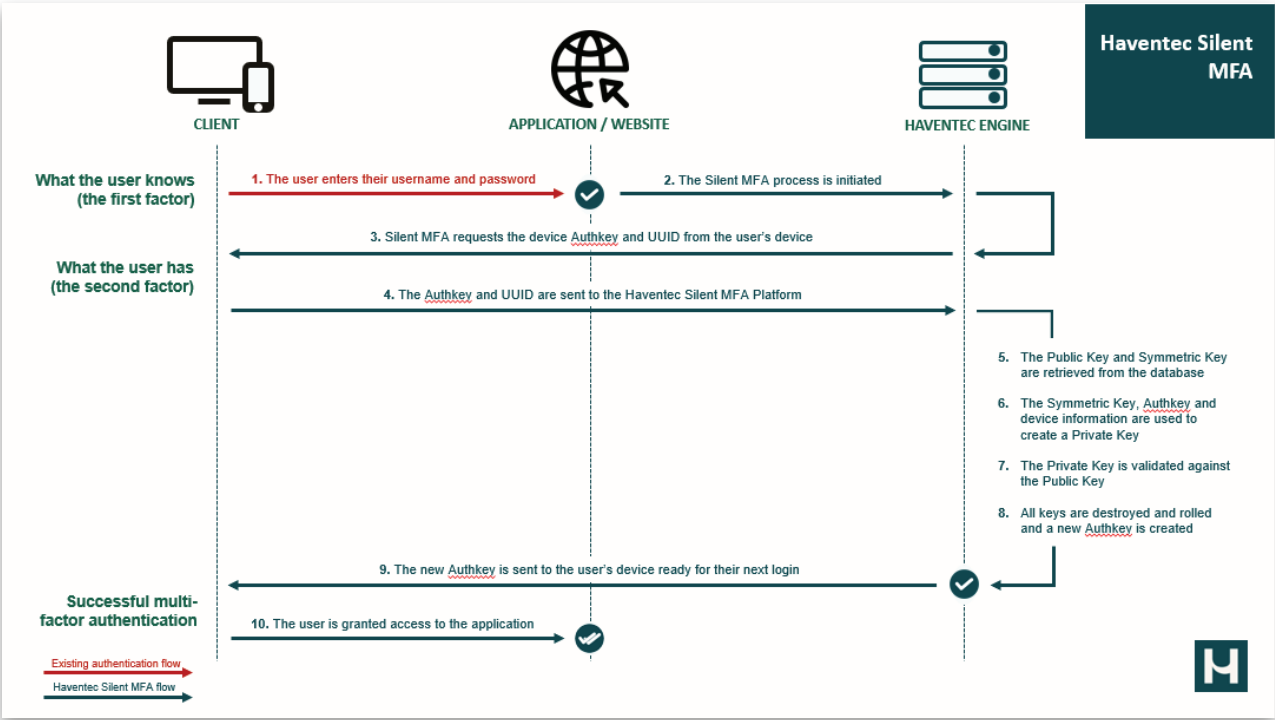

- No one-time-PINs.
- No SMS costs.
- No authentication apps.
- No tokens / smart cards.
- No USB keys.
- No QR codes.

- Haventec Silent MFA is always on.
- Is not dependent on the enterprise, or your users, upgrading any hardware or software.
- No private keys need to be stored by your users or in your enterprise.
