Mobile – iPhone, Android application.

ERP - Oracle, OpenERP, WEbERP,

CRM – Sales Force, vTiger, Sugar CRM

Cloud Technology

Face book, LinkedIn Integration and application Development.

Online Application development.

Online inventory & Order Management.

Scheduling and Appointing booking systems.

Website: www.itsabacus.com

Portfolio: <http://www.itsabacus.com/portfolio-gallery.html>

About client & Project

Innovative Infusions, LLC was founded in 2001 to close a significant gap in healthcare by changing the way IV medications are delivered to patients. Historically, hospitals and home health agencies were the only options available to provide IV therapy for the community. Although sometimes necessary, these options are not able to achieve the high level of patient care offered in the physician-directed, outpatient environment. With a growing presence, we believe we are changing the traditional healthcare model to offer patients a low cost, high quality alternative in infusion therapy

About the project

Dripsync functionalities –

- ❖ Patient Management.
- ❖ Insurance Management and background history.
- ❖ Medications.
- ❖ Appointment and Booking systems.
- ❖ Document Management System
- ❖ Payment Management System.
- ❖ Referral and Authorization Module.
- ❖ Insurance Claims and Account Billing System.
- ❖ User Management and Control system

Health Care Reform in United States

Health Care Reform in United States:

Health Care reform in US was most recently enacted nationally in 2010 by the passage of two bills:

- ❖ The Patient Protection and Affordable Care Act (PPACA) which became law on March 23, 2010.
- ❖ Healthy Care and Education Reconciliation Act of 2010 which amended the PPACA and became law on March 30.

2010 The Patient Protection and Affordable Care Act is enacted by President Barack Obama, providing with reforms designed to eliminate “some of the Worst practices of the insurance companies”. The system preserves private Insurance and private health care providers and provides more subsidies to enable the poor to buy insurance

Health Insurance Portability and Accountability Act (HIPAA)

Health Insurance Portability and Accountability Act (HIPAA) :

The Health Insurance Portability and Accountability Act (HIPAA) of 1996 was enacted by US congress in 1996.

❖ **Title I** of HIPPA protects health insurance Coverage for workers and their families when they change or lose jobs. Title I also limits restrictions that a group health plan can place on benefits for preexisting conditions.

❖ **Title II** of HIPPA, known as the Administrative Simplification (AS) provisions, requires the establishment of national standards for electronic health care transactions and national identifiers for providers, health insurance plans, and employers

Introduction to Patient Management System Page:

The objective of the page is to show complete details of patients admitted along with their information like DOB, Email, Contact Number, Gender etc..
