4. IT enabled achievement of strategic objectives
5. Solutions to complex IT problems
6. Availability of highly skilled IT professionals
7. One stop destination for all Software Development Solutions.

MEDIA & ENTERTAINMENT

ENTERTAINMENT
MEDIA SPECIALISTS

ABOUT COMPANY:

Entertainment Media Specialists has rapidly proven itself as a superior force in the entertainment payroll industry. EMS is on the cutting edge of entertainment payroll with their complete understanding of a production from a financial viewpoint. EMS is a unique enterprise which offers a complete service while providing extensive expertise. This allows EMS the ability to provide the finest level of client service which is first rate among the major studios and the independents while affording a personalized custom experience.

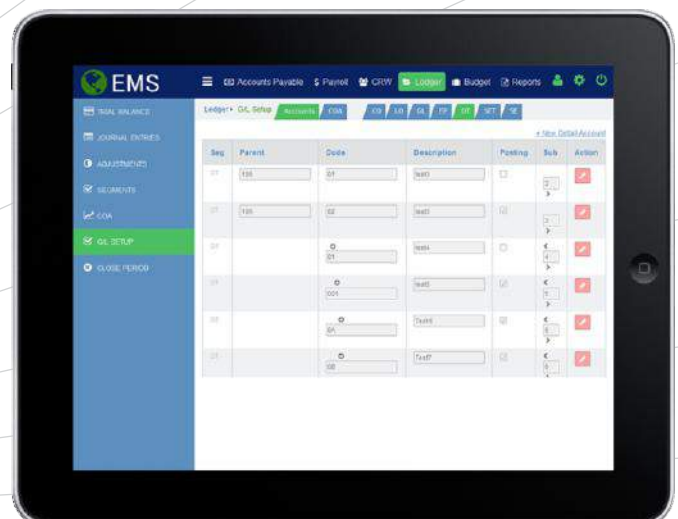

PROBLEM STATEMENT:

EMS had developed the payroll and expense management system that was developed in last decade. As the clients expectations regarding reports and alerts constantly going up and complexity of data increasing day by day.

The system is becoming increasingly inadequate to deal with the level of visibility into data required by their clients.

SOLUTION:

ACS developed a detailed enterprise level accounting system to deal with any level of complexity in a media accounting system, that gave EMS flexibility on the systems. With advantages like real time reports, Cost report worksheets, Budgeting, customized ledger, convenient Ledger Entry, and other features prevalent in traditional accounting software.

**ABOUT PROJECT:**

Thriii Inventory & Warehouse management application bridges the gap between popular small business accounting software, order sources, and shipping software. This application allows SMBs to intelligently manage order and inventory flow along with warehouse processes while seamlessly integrating with accounting and shipping systems; all at a monthly subscription cost that is small business budget friendly

PROBLEM STATEMENT:

Client owns an online shop that sells products on various platforms like

-Amazon, eBay, -Magento / Online Shopping Cart, POS System, Brick & Mortar Store etc.

They avail various 3rd party services Like –

Ship Station, UPS / USPS / FedEx, QuickBooks, Great Plains, Vendor management system

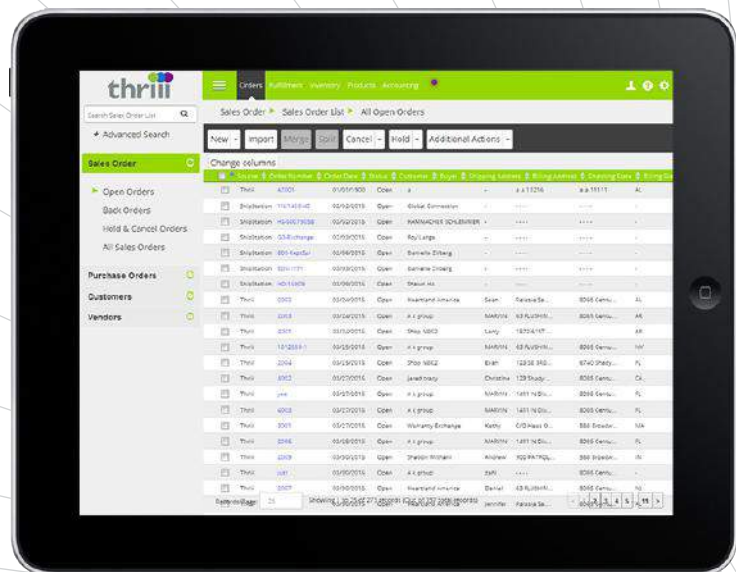

And they need to manage their inventory at various Warehouse locations to fulfill these orders

SOLUTION:

ACS Created a multi-vendor online Order & Inventory Management system Thriii for them.

This system serves their business with following modules -

- Product Management
- Warehouse Management
- Customers
- Sales Orders
- Vendors
- Purchase Orders
- Charts of Accounts (COA)
- Accounting Modules
- HR
- Billing & Payments
- Reporting & Forecasting
- Alert Management System
- Integration with Google Map / Calenderer

ABOUT COMPANY:

MaxCon Cloud Software is the next generation in web-based construction management software. MaxCon's state of the art technologies help enhance the relationships between contractors, insurance carriers and property owners that can refine the claims process, renovations and new construction. It's a web-based software to the general contractor, specialty trades, and roofing contractor markets.

PROBLEM STATEMENT:

Maxcon wanted to develop a comprehensive solution for the construction industry to take care of all the aspects of the business to streamline the construction production process, reduce the technology staff, eliminate server and resource expenditure, improve sales process and to give a better control to the management by providing the most recent snapshot of day to day business activities.

TECHNOLOGY AND ARCHITECTURE:

MaxCon Software has expertise in Coupling Cutting edge Technology and Most Efficient Processes / Methodology with Industry Know How.

Maxcon is developed using Cloud Computing, .NET Architecture, MySQL 2008 R2, IIS Server, JavaScript with QuickBooks, Bing map and Google Calendar integration.

FUNCTIONALITY DEVELOPED:

- CRM
- Customer Mapping
- Lead Management
- Activity Diary
- Roof Diagramming
- Google Calendar Scheduling
- Sales Management
- Production Management
- Weather Features
- Analyze
- Reporting

ABOUT COMPANY AND PROJECT:

Anderson's Inc began as a single grain elevator. The premise of the original organization, founded by Harold Anderson was to make it easy as possible for farmers to get an idea of nutritional values of the land and possible fertilizer usage to make it productive.

FUNCTIONALITY DEVELOPED:

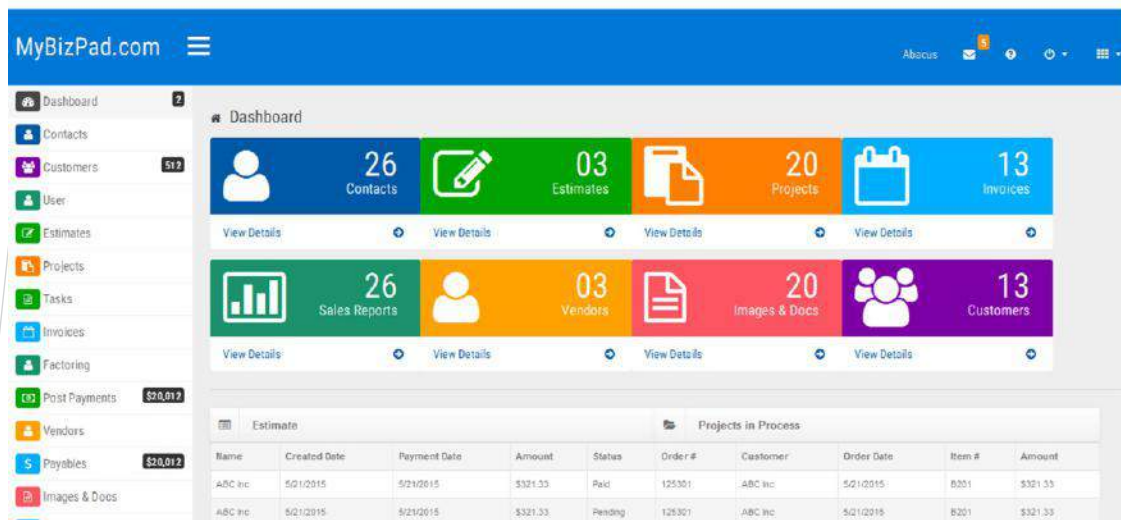

Anderson's Inc was looking to develop a tool for farmers that could aid them in analyzing soil nutritional values and extrapolate the impact of fertilizer application on their crop.

ACS developed this solution called Turf Nutrition Tool . TNT helps Agricultural companies in budgeting for fertilizer procurement based on soil, size of land, weather, type of field and multiple other factors.

ACCOUNTING & FINANCIAL SYSTEM

About Company :

1st Commercial Credit, LLC is recognized as one of the largest independent providers of asset based financial services for small to mid-sized businesses. They offer USA based companies a complete line of invoice factoring services, invoice discounting, inventory finance, purchase order financing, international trade finance and other related financial services.

Problem Statement :

1st Commercial Credit, LLC wanted to develop a comprehensive solution with cloud based application for financial and accounting based companies to take care of all the aspects of the business to complete line of invoice factoring services, invoice discounting, inventory finance, purchase order financing, international trade finance and other related financial services.

Technology and Architecture :

A system was needed that could be maintained without expensive licensing cost. So ACS suggested LAMP architecture on a cloud based System. The final solution was hosted on a Linux server.

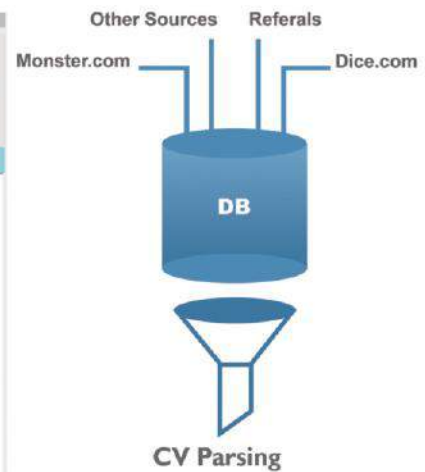

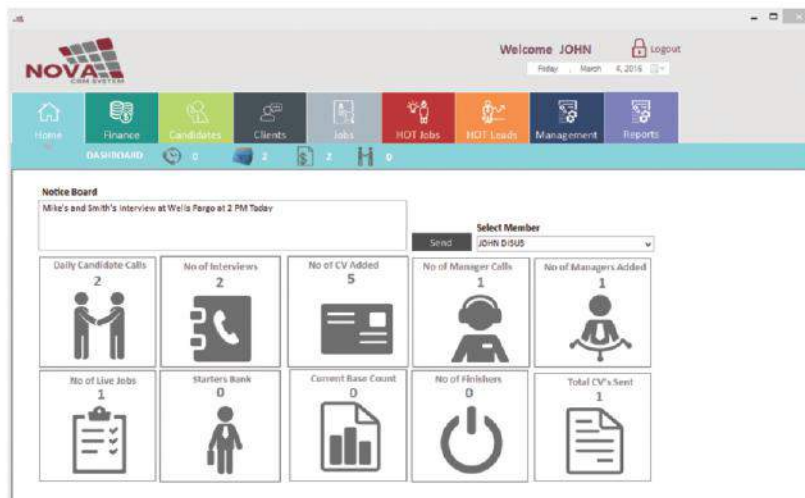

Broad Features of Application :

- User Management
- Chart of Accounts
- Inventory
- Vendors
- Contacts
- Customers
- Estimates
- Project
- Task
- Invoices
- Payment Received
- Sales Reports
- Purchase Order
- Email Alerts

RECRUITMENT AND STAFFING CRM

Technology Used

- C#
- MSSql
- PHP
- Mysql
